

Infused with vitamins, electrolytes and natural energy, M's GO•stik functions perfectly with your body to deliver smooth, steadfast, pure energy to power you through the day.

Everyone gets it. That 5 P.M. exhaustion and lag. Your engine runs out of fuel and you come to a slow crawl. Your body is a machine, and the fuel is the nutrients you put into it. We're all busy, and tend to **compromise nutrition for convenience.** And we all know that burger, while delicious, doesn't fuel you properly, and does nothing for your waistline.

GO•STIK is packed with essential nutrients your body needs to give you the most energy throughout your day. The best part is it's not packed with heart stopping caffeine and sugars, but **natural ingredients** engineered to be highly effective, good for you, and **supremely tasty.**

SHALL WE GO THROUGH WHAT **GO•STIK** CAN DO FOR YOU? ▶

- SMOOTH WITH NO JITTERS
- SUGAR FREE
- ELECTROLYTE ENHANCED
- UNRIVALED TASTE

PERFECT ENERGY

raspberry

30 stiks per box

GUARANA

This plant not only helps keep you energized, it helps with your body's metabolism, breaking down foods and extracting more energy.

YERBA MATE

A botanical that is not only packed with antioxidants that help your body with nasty free radicals, it's also packed with nutrients, natural caffeine, and has even been known to have a euphoria type effect on moods.

NIACIN

Niacin is key for a healthy heart. Also known as B3, Niacin can help lower cholesterol and stimulates blood flow throughout your cardiovascular system. Not enough B3, is one of the culprits of your afternoon lag.

PANTOTHENIC ACID

Known to most as vitamin B5, this helps break down sugar in your system, turning it into energy instead of love handles. It also has a hand in burning fat and utilizing protein properly.

VITAMIN B6 & B12

Probably the most well known of the vitamins because many people don't get enough. A shame, as it attacks fat cells. It also plays a key role in clearing your mind and rebuilding brain cells.

MAGNESIUM

A powerful electrolyte that is essential for enzymes and energy production. It regulates all that natural caffeine we just talked about, so it helps with the stability of your energy. Keeping your energy levels, level.

SODIUM

Another powerful electrolyte that is often forgotten. When we sweat we lose sodium, which needs to be replaced in order to better regulate our nervous system function, muscle use and cellular growth. And no, the salt from fries doesn't count.

POTASSIUM

Another electrolyte that packs a mighty punch, potassium regulates kidney health, insulin levels, muscle growth and pretty much every other organ. Yeah, it's important.

HOW?

So how on earth is it possible to put all these things in powdered form, without sugar, AND make them tasty? It shouldn't be, but somehow we did it. Using natural flavors that are naturally sweet, we created a product that is easy to use, packs key nutrients as well as an energy payload that doesn't make you jittery, and doesn't taste like chemicals. Make your past, exhaustive days green with envy, and strut, walk, skip, or run your way through your day. Because hey, now you can.
